

RK Stand System

Positioning
made easy

Positioning made easy

Maximum stability and flexible alignment for loads of up to 60 kg – the RK stand system. The new high-grade stand system is ideally suited for holding and positioning industrial marking, display and operating devices, such as labelling machines, optical readers, camera systems or 3D scanners – to name but a few. The respective load can be aligned precisely in the space and adapted to changing requirements.

The RK stand system is manufactured entirely from the RK modular product system.

Features:

- Straightforward vertical and horizontal manual adjustment
- Self-locking trapezoidal screw spindles
- Vertical or horizontal connection elements for terminal devices
- Axes freely lockable thanks to lift clamp
- Adjustable axes guide
- Anodised aluminium base with adjustable feet
- Load-bearing capacity of up to 60 kg
