legacy

seating and tables80-82

enthusiastically supporting the efforts of Healthier Hospitals

Wieland offers a full line of products free of potentially hazardous chemicals. Our desire is to make it easy to specify furniture meeting the Healthy Interiors goal of the Safer Chemicals Challenge.

All of the seating products are free of flame retardants, are GreenGuard® certified, meet PFC (stain repellent) guidance, are PVC-free and comply with UL2818, ANSI/BIFMAX7.1-2011 and ANSI/BIFMA e3-2014e Credit 7.6.1. and 7.6.2. Exceptions to the above are customer specified items such as Fabrics, Thermoform options, or requirements for CA TB133.

sustainability

Sustainable design includes responsible resourcing, continued recycling and enhancing existing internal processes. Compliance with the latest environmental laws and regulations is a natural by-product of our long-term commitment to our customers. We actively seek to conserve, recycle, and act with respect toward our environment.

- 100% of steel, foam, wood, plastic, and corrugated packaging used is recyclable
- 90% of the fabrics offered are environmentally-conscious products
- 70% of supplies come from within a 500 mile radius of NW Ohio and NE Indiana
- All furniture is designed to be easily renewed, maximizing the useful lifespan of the product

greenguard®

GREENGUARD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air.

Indoor air quality (IAQ) is closely tied to health, it's an important concern in homes, schools, healthcare environments and commercial spaces. VOC emissions from building materials and furnishings is a major source of indoor air pollution. GREENGUARD Certification provides manufacturers with credible tools to verify and promote their sustainability efforts.

GREENGUARD Certification has been widely adopted as a trusted standard for low-emitting products, and has been the basis for the LEED credit for low emitting furniture since 2002.

BIFMA e3 level®

Wieland is proud to demonstrate a commitment to the environment, and to both the quality and performance of products through BIFMA e3 LEVEL testing and certification. Most customers demand that goods be manufactured to meet requirements for quality. And many consumers are also insisting that processes be Safe, Clean and Environmentally friendly or Sustainable.

This certification is a multi-attributed, multi-faceted approach resulting in sustainable manufacturing within the furniture industry. The program provides manufacturers with valuable feedback to better evaluate their impact on the environment, and also on the human population. The program also helps manufacturers gain understanding on the social impact of their furniture products. The LEVEL takes into account the manufacturing, facility, and organization impacts at all levels before granting any certification.

it's what you can't see that's a welcome difference

fabrics

the fabrics are held securely in place with hook and loop closures and are easily removed for cleaning or replacement on-site.

construction

our methods make it easy to access components often with one simple tool.

wood

a strong interior framing made of hardwood baltic birch and plywood, providing more stability than ordinary solid hardwood framing that can crack over time.

moisture barrier

a pliable, laminated waterproof membrane adds protection from liquid damage – spot cleaning becomes a simple task.

foam

only the highest quality, high-density foams are used and are covered under warranty – no exceptions.

environmentally responsible

we actively conserve, recycle and act with respect toward the environment. Going beyond the basics required, we strive for responsible resourcing, recycling and adapting our internal processes and procedures.

finishes

Wieland furniture incorporates a variety of materials and finishes. Any beautiful wood can be custom color matched and has a 2-part polyurethane finish providing superior durability for a long-lasting finish which is easy to clean and disinfect.

original thinking award winning products like sleepToo® and Allay® set the bar in the sleep sofa category, and many of our products are backed by multiple patents.

always sustainable compliance with the latest environmental laws and regulations is a natural by-product of our long-term commitment to our customers.

customer inspired voice of customer (VOC) research provides valuable insight aiding in the creation of innovative, customizable products for changing environments.

service focused an experienced team of dedicated individuals provide prompt service, many of whom have been a part of the Wieland team for 15+ years.

lasting value every product is warranted against failure. If something isn't right; we make it right. If something is broken; we fix it. It's that simple.

With sleepToo® existing spaces are reclaimed for storage, opened up as free floor space, or for other uses. sleepToo is the real solution for family-involved care.

- Family Zone - sleepToo sofa
- Caregiver Zone
- Patient Zone - wardrobes, bedside table, patient chair

accord™ recliner

headrest

intelliTrac caster

pushbar

safeBrake

recliners

accord[™]
the recliner that does

safeBrake grips the floor securely, delivering exceptional stability and makes a solid stop on uneven floors. An industry first, only Wieland separates the casters and brakes. Accord's dedicated brake system out-performs brake systems that are combined with the casters.

intelliTrac[™] casters auto-align and auto-release, offering the control to change direction quickly from straight to sideways. While the chair is tracking straight, a small nudge will move it sideways to help maneuver into tight spaces.

recessed flip table
neatly folds into a stowed position; easy access and cleaning

transfer arm
a front released arm pivots to chair back for an obstacle-free patient transfer

headrest
adjustable height cushion can be easily added to existing recliner

quick release seat
simplifies infection prevention efforts

recline assist bar
for intuitive, effortless reclining; only on sleep and Trendelenburg models

This warranty covers the structure of the furniture: the laminated veneer or solid wood frame, the construction of the arms, table legs and stretchers, and all fasteners. This warranty also covers the foam against defects in its manufacture and composition for this same 25-year period. Under this warranty, Company will, at its option, either replace or repair furniture returned to it or will supply the Customer with replacement parts. Any labor required to upgrade the units may or may not be covered under our warranty without prior consent in writing by Wieland. Any work performed by a non-approved 3rd party will void the warranty. All freight charges for returns or replacements will be paid by Company during the 25-year warranty period. Fabrics, finishes, COM- and all items beyond the control of Company are not covered by this warranty.
