Greetings Design Professionals!

Advanced Cabinet Systems is excited to introduce to you our 2nd plastic laminate casework catalog for specification section 123216! We are publishing this catalog to prove our commitment to you and the industry as a whole. We are also publishing this catalog to make it easier than ever to specify plastic laminate casework on your projects!

Perhaps the biggest difference in this catalog is that it incorporates our partnership with ARCOM, the specification experts who exclusively publish MasterSpec®, a product of the American Institute of Architects (AIA). We are excited about our new partnership with ARCOM and feel that the updated specifications provide more clarification and will improve the level of quality and service end users receive from plastic laminate casework manufacturers across the country.

We worked with ARCOM for months and we tailored our specifications and products to fit within programs that many of you are already using. This partnership will make the process of specifying ACS plastic laminate casework much easier. The new specification section will allow you to get much more competitive and accurate bids, helping to eliminate headaches and multiple change orders down the road.

Not a MasterSpec user? Not a problem! With this catalog and your relationship with ACS, you have access to the same specification section and can download it in multiple digital formats directly from our website, www.advancedcabinetsystems.com.

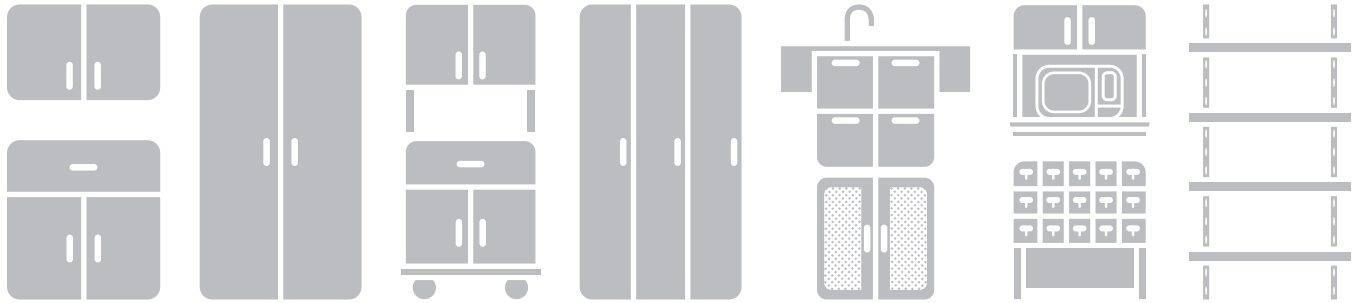

As you can tell, we're excited about the future! In 2016 Advanced Cabinet Systems celebrated our 35th year in business and we feel like we're just getting started. We are still a family owned and operated business based out of Marion, Indiana and we are dedicated to advancing the casework industry.

Please contact us with any comments, questions or upcoming projects you may have. We want to help you in any way that we can.

We look forward to becoming your preferred casework manufacturer.
