

CUSTOM FORMED TUBING

Optinova can manufacture custom formed fluoropolymer tubing and special extruded shapes. We can produce configurations in PTFE, PFA, FEP, ETFE and PVdF. This is also referred to as Fabricated Tubing.

These made-to-order configurations give the customer the possibility to order the exact part to fit their requirements, saving time and installation cost.

- Temperature resistant from -260°C to $+260^{\circ}\text{C}$.
- Does not age. does not burn, does not emit smoke.
- Resistant to most chemicals and solvents.
- Wide range of colors available.
- Excellent dielectric properties.
- UV resistant for outdoor applications.
- Material conform to RoHS, REACH, FDA
- Suitable for food contact (coffee machines)

Optinova can produce sizes and colors according to customer requirements.
